**Illumination Award for Outdoor Lighting**

**Judging Sheet**

**Complexity of the Problem**

Max Value 20 points

- Tells the project story and challenges; possible topics include scope; Difficulty of visual tasks; Energy limitations; Stylistic and structural requirements; Budget restrictions; Maintainability

**Lighting Concept**

Max Value 15 points

- How well does the lighting design reinforce the architectural environment of the building and site features?
- Is the approach original or unique?

**Controls Concept**

Max Value 5 points

- Are controls utilized effectively with respect to energy management and visual needs? Are the controls properly applied to support the lighting design?

**Integration**

Max Value 10 points

- Has the lighting equipment been integrated into the building and site effectively?

**Performance Criteria Achieved**

Max Value 20 points

- How did the design answer the complexity of the problem?
- Does the project employ an innovative approach to the lighting solution?

**Visual Comfort**

Max Value 15 points

- Is the quality of the lighting appropriate for the user? Has the solution addressed user needs such as viewing comfort, glare, and contrast ratios?

**Energy and Environmental Design Implementation**

Max Value 10 points

- Does the project design achieve the stated goals for energy performance and night sky preservation? Does the project go above and beyond basic energy goals?

**Discretionary Bonus**

Max Value 5 points

- For exemplary project performance
